

Security at Zyra

Security is a core priority at Zyra. The platform is designed to protect user funds, data, and campaign integrity while leveraging blockchain technology to enhance transparency.

Fund Security and Custody

Zyra may temporarily hold funds raised through campaigns to ensure secure processing and appropriate disbursement.

Funds are managed using secure infrastructure and internal operational controls. Zyra is not a bank or licensed financial institution, but applies industry-standard safeguards to reduce risk.

Zyra reserves the right to delay, restrict, or withhold fund access where necessary to prevent fraud, misuse, or policy violations.

Platform and Infrastructure Security

Zyra implements multiple layers of security, including:

- Secure servers and protected databases
- Encryption of sensitive off-chain data
- Restricted internal access to critical systems
- Continuous monitoring for suspicious or unauthorized activity

Blockchain Transparency

Donations and fund movements on Zyra may be recorded on the blockchain.

Blockchain records are public, verifiable, and immutable. Once data is published on-chain, it cannot be altered or removed. Zyra does not control blockchain networks and cannot modify blockchain data.

Smart Contracts

Smart contracts used by Zyra are developed following established best practices and are tested prior to deployment.

As the platform evolves, Zyra may engage independent third parties to conduct security reviews or audits. Despite these measures, no smart contract system is entirely free from risk.

Fraud Prevention and Monitoring

To protect users and maintain platform integrity, Zyra may:

- Review and verify campaigns
- Monitor activity for irregular or suspicious behavior
- Request additional information from campaign creators
- Pause, freeze, or investigate fund flows when necessary

User Responsibility

Users are responsible for maintaining the security of their accounts and devices.

Zyra will never request passwords, private keys, or wallet recovery phrases. Users are encouraged to verify campaign details independently before donating.

Security Disclaimer

While Zyra applies reasonable security practices, no system can guarantee complete security. Users acknowledge and accept the inherent risks associated with online platforms and blockchain technology.

Reporting Security Issues

Security concerns or suspected vulnerabilities should be reported to:
support@zyra.fund (or your official support contact)
